**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Lidbetter [US EP 1 079 547].

Regarding claim 1, Lidbetter discloses a system and method of providing a mobile telephone service on board a vehicle (see col. 1, lines 3-5 and fig. 1), said system being connected to a public land mobile network (see 4 in Fig. 1) via a satellite (see 6 in fig.1) and including means for setting up at least one transport connection between said vehicle and said public land mobile network before receiving a call request and for then using said transport connection for a call as soon as a request to set up a call is received. See col. 2, paragraphs 6,7,8 where the tracking radio link provides a continuous transport link that can be used to setup a call as soon as a request for call setup is rec'd. See also col. 3, paragraph 11, col. 4, paragraph 16

Regarding claim 2, Lidbetter discloses a method wherein the said transport connection remains in standby state. See col. 2, paragraphs 6,7,8 where the tracking radio link provides a continuous transport link that can be used to setup a call as soon as a request for call setup is rec'd. The reference discloses a method where the satellite link is continuously established i.e. the link is in the standby state until a call setup is received. See also col. 3, paragraph 11, col. 4, paragraph 16.

Regarding claim 3, Lidbetter discloses a method wherein the duration of said transport connection is limited and reactivated in accordance with a time-delay. See col. 3, lines 19-22 and paragraph 13. Here the satellite link is reactivated after a time delay when the ship again leaves the shore and when there is no interference to the base station on board from the fixed base station on shore.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lidbetter [US EP 1 079 547] in view of Horrer [US 6,321,084].

Regarding claim 4, Lidbetter discloses all the limitations as claimed. However he does not disclose in particular wherein said vehicles are aircraft.

Horrer, in the same field of invention, teaches a method of setting up telecommunication for persons on board a vehicle such as an aircraft.

Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to provide the above teachings of Horrer to Lidbetter in order that the

person subscribed to a telecommunications network continues to be reachable in stationary or mobile facilities such as aircrafts.

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wiedman [6,072,768] Automatic satellite/terrestrial mobile terminal roaming system and method

Taylor [US 6,643,510] Mobile platform real time availability and content scheduling system and method

Sinivara [US 6,603,967] Call routing in a radio system

Roux [EP 1041737A1] Ground/aircraft passenger telecommunication system

Ogawa [JP 405129998A] Satellite communication system
